News Release No.: 05-08

### California's Unemployment Rate Unchanged at 5.8 Percent <u>Payroll Employment Up 27,600 Jobs</u>

**SACRAMENTO** – California's unemployment rate was 5.8 percent in February, unchanged from a revised 5.8 percent in January, the state Employment Development Department (EDD) reported today. A year ago, in February 2004, California's unemployment rate was 6.4 percent.

According to EDD's survey of employers, nonfarm payroll employment in California grew by 27,600 jobs over the month, for a total of 14,681,600.

According to the separate survey of households, the number of Californians holding jobs in February was 16,718,000. This was an increase of 128,000 from January, and up 372,000 from the employment total in February of last year.

Editor's Note: February 2005 shows an unusually large increase in civilian employment in California, up 128,000. At this point it is unclear how much of this gain is attributable to the new federal Bureau of Labor Statistics (BLS) methodology or to actual job creation over the month. The new methodology is designed to better identify changes in the economy on a real time basis and for the first time is including 2000 Census data. EDD's Labor Market Information Division analysts will continue working with BLS to closely monitor California's civilian employment numbers over the next several months. Users are reminded that the monthly data are always preliminary and subject to revision in subsequent months.

The number of people unemployed in California was 1,021,000 – an increase of 1,000 over the month, but down by 105,000 compared with February of last year.

Of the unemployed, 405,900 were laid off, 146,100 left their jobs voluntarily, and the remaining were either new entrants or reentrants into the labor market, or persons who completed temporary jobs.

UNEMPLOYMENT INSURANCE CLAIMS (NOT SEASONALLY ADJUSTED)

In related data, the EDD reported that there were 422,683 people receiving regular unemployment insurance benefits during the February survey week. This compares with 418,919 last month and 470,489 last year. At the same time, new claims for unemployment insurance were 47,791 in February 2005, compared with 48,180 in January and 48,874 in February of last year.

#### WAGE AND SALARY EMPLOYMENT DETAIL (SEASONALLY ADJUSTED)

EDD's report on payroll employment (wage and salary jobs) in the nonfarm industries of California totaled 14,681,600 in February, a net gain of 27,600 jobs since the January survey. This followed a gain of 8,500 jobs (as revised) in January.

Seven of the categories (natural resources and mining; construction; information; professional and business services; educational and health services; other services; and government) added jobs over the month, gaining 33,900 jobs. The construction industry showed the largest gain, up by 10,700 jobs. Three categories (manufacturing; trade, transportation and utilities; and leisure and hospitality) reported job declines this month, down 6,300 jobs. Trade, transportation and utilities posted the largest decline over the month, down by 3,200 jobs. One category, financial activities, was unchanged over the month.

In a year-over-year comparison (February 2004 to February 2005), nonfarm payroll employment in California increased by 234,500 jobs (up 1.6 percent).

Eight industry divisions (construction; manufacturing; trade, transportation and utilities; financial activities; professional and business services; educational and health services; leisure and hospitality; and other services) posted job gains over the year, adding 252,000 jobs. On a numerical basis, professional and business services showed the strongest employment growth, adding 63,800 jobs (a 3.1 percent increase). On a percentage of growth basis, construction showed the strongest gain, up 6.4 percent (adding 53,100 jobs).

Three categories (natural resources and mining; information; and government) posted job declines over the year, down 17,500 jobs. On a numerical basis, government employment showed the largest decline, down by 11,300 jobs (a decline of 0.5 percent).

#### WAGE AND SALARY EMPLOYMENT DETAIL (**NOT** SEASONALLY ADJUSTED)

Over the month, **government** recorded the greatest non-seasonally adjusted gain, up by 22,200 jobs. Most of the gains were in state and local government education, which were up by 4,000 and 15,800 jobs, respectively. Over the month, **trade**, **transportation and utilities** recorded the greatest non-seasonally adjusted loss, down by 18,700 jobs. The losses were concentrated in the retail trade sector, which declined by 20,900 jobs.

Over the year, the **professional and business services** industries reported the largest gain, up 66,300 jobs. The largest gains were in the administrative and support services sector, primarily in employment services, which was up by 34,100 jobs. **Information** and **government** recorded the largest decreases over the year, each down by 6,000 jobs. This included a loss of 8,200 jobs in motion pictures and sound recording and a loss of 8,000 jobs in federal and state government.

Seasonally adjusted payroll detail follows:
